THE DOOM OF THE BORTH WOODS. It is sad news that comes from Alban regarding the probability that the great North Woods is doomed. Railroad com ranies backed by big capital have opened strife for the possession of the noble forest lands, and it is stated that in all likelihood the woods will, within the next decade, be come nothing but a memory.

Three railroads are in the fight, each

seeking to extend its chances for Summer passenger traffic, and each bound, also, to force a way through to Montreal. If they succeed in getting their tracks through the forest, as they apparently can do under the mean almost beyond doubt the abandonment of the Adiron dack State Park scheme and the beginning of the end for the forest. The Forest Commissioners say they will fight the railroads in the courts, but they have their hands tied by a surprising provision of the new General Railroad law, under which the companies have already applied to the Land Commissioners for permission to build across the State property in the Adirondacks. This provision of the new law apparently subjects the State forest property to the same processes of con demnation as may obtain in the case of other State lands.

There are many reasons, economic, cli matic and sentimental, why the threatened destruction of the Adirondack forest is to be deplored. Experience in other States, particularly in the West, has shown many evils that may follow the too thorough clearing of the wooded lands. It is to be sincerely desired that in some way the doom of the North Woods, now seeming almost certain, may yet be averted.

THE MAIDENS AND THE TARS.

The jolly youngsters of the Spanish manof-war Nautilus had a great day yesterday. They visited the Normal College with their officers and Commodore Concos. The Aldermen chaperoned the school party.

The youthful navigators of the Nautilus are Spaniards, and fear no more the witch cry of a radiant maid than they do the ter rors of the deep. But they were slightly dazed at being introduced to 1,800 aweet American girls all at once. Perched on the platform, they looked down on the plain of rosebuds stretching before them and gasped

One real Normal American girl saw how the dark Andalusian marines qualled before the dynamite of so many sparkling eyes, and with a sweet girly-girl desire to see them at their case, let the lid of her off eye drop and rise with a quick but finely calcu. lated sympathetic action. Hows of white testh flashed recognition of her complain ance, and the boy tars settled back in their chairs perfectly at ease.

The girls sang for them, walked for them, all their paces. The old Commodore spoke the thanks of his gallant band of sailor boys, who indorsed it with their beaming eyes. They had an immense time and want to see some more schools of girls. The girls enjoyed it, too.

OPPOSITION NOT TO GOULD.

If ERASTUS WIMAN is correctly quoted in connection with the matter of the L ros and Battery Park, that opposition to th road's projects was due to the fact that Jax GOULD was a large stockholder in the road

That such a view of the matte is a gravely mistaken one, it is hardly necessary to state. The opposition to the L road's further encroachment upon Battery Park, or any other park, is based upon broader grounds than those afforded by any man's ownership of stock in the road. It is based upon the rights of the people to have and enjoy undisturbed the breathing-places which have been granted to them in recognition of their need. The L road is even now a treepasser on those rights, and it must never be allowed to extend its trespassing.

Defaulters should not carry their dogs with them when they abscord. A Grand Rapids man who had transposed \$150,000 was tracked to his hiding place through some one recognizing his fine Saint Bernard dog and following i. up. If the dog had known this he would probably have gone in some other direction. This should not be regarded as a slur on the reputation of man's faithful friend.

It is not often that a fellow who has three times left his betrothed at the alter just before the knot was tied has an opportunity to stand there with her again. But a Jersey swatn returned after a triple desertion of this kind and said it was only shfuiness, and he wanted to try again. The girl succeeded then in keeping him long enough to get married.

Commissioner BEATTIS is to appoint a permanent street-sweeping corpe. Then to establish permanent arrangements for disposing of the sweepings.

The printed stories of the Western fires which sweep forests and settlements before them are full of thrilling suggestions. Perhaps no actual experience with those flames

ons been more impressive, however, that that of the passengers on an Omaha train which raced with the flery pursuer last night over a burning trestle in Wisconsin.

The would be train wreckers are abro again. Their murderous attempt failed on he West Shore road last night, but the fallure should not lead to a less determined effort to find and punish the fiends engaged

Providence is threatened with a big nunicipal scandal. The Mayor is to investigate charges that the tavern-keepers have been paying liberally for police proection while doing unlawful business.

Kentucky had its great Derby yesterday, and at least 15,000 people saw Kingman win it. We have our big Brooklyn Handicap to-morrow, and what multitudes will see some grand racer gallop in ahead!
